

Bluetick[®] Water Solutions

When Every Drop Counts

Maximize Productivity and Lower Operating Cost

Operating budget constraints are driving water utility and management companies to focus their attention on improving operational efficiencies. Site maintenance is challenging and facility personnel need information to help them troubleshoot and mitigate site problems before they become serious.

Critical site conditions require up-to-date, real time information that can be evaluated to deploy the right people and the proper equipment to minimize downtime.

Bluetick provides water management solutions to help remotely manage sites, lower costs and improve water delivery. Our technology solutions provide tangible and immediate economic benefits to water utility and management companies.

REMOTE MONITORING SOLUTIONS:

- Lift Stations
- Aquifer / Wells
- Water tanks high / low levels, current levels
- Down-hole Reservoir Levels
- Rainfall
